

Customer Loyalty Program

The latest access technology — at a very low cost per port

Don't let budget limitations keep you from simplifying your IT operations with the latest KVM technology.

Trade in your existing Raritan KVM switches (MasterConsole®, Paragon®) and competitor's switches* and migrate to next generation KVM-over-IP, expand on your analog Cat5 solution, or move forward to a hybrid solution.

Now, for a limited time, we're thanking our loyal customers with an unprecedented offer. Trade in your legacy KVM switches for a state-of-the-art access solution that:

- Works with existing, industry-standard AAA servers (Active Directory®, LDAP, RADIUS, etc.) to streamline policy administration and compliance reporting
- Universal Virtual Media, Absolute Mouse Synchronization™ and Dual Power Supply with automatic failover on all Dominion® KX II models
- Provides expanded remote access/management capabilities for anytime/anywhere access
- Simplifies and centralizes user, policy and access management
- Streamlines cabling and rack deployments
- Integrates new technologies like IPMI, embedded solutions, KVM, Serial and more
- Provides a simple, more secure, user interface and experience

Move up to our newest access technology and cut through the barriers of complexity, time and distance to help you simplify and accelerate IT operations and give your staff one of the more precious resources of all—time to spend on activities that grow your business.
