– 4-port with 2 cables

SwitchMan PS/2

2- or 4-port PS/2 KVM Switch

SW2 – 2-port

SW4 – 4-port

Reclaim your desktop; Save space, time and money

SwitchMan is a unique KVM switch that combines advanced, professional-grade technology with an easy-to-use design that fits naturally on your desk. Color-coded connectors and premium, ultra-thin coax cables make installation easy. The SwitchMan KVM allows control of up to four computers from a single keyboard, video and mouse.

SwitchMan's USB and COMBO models have a built-in USB 2.0 Hub, which allows the sharing of multiple USB-supported devices, including scanners, digital cameras and printers to be shared among multiple computers. Plus, the SwitchMan USB and COMBO models offer audio switching functionality that lets you share a single microphone and stereo speakers among multiple computers.

Professional performance, low price

SwitchMan includes the same bulletproof reliability as all Raritan enterprise-class products used in over 50,000 data centers world wide. Raritan's KVM switches are designed with "keep-alive" circuitry that eliminates annoying mouse and keyboard lock-ups when switching between computers. No matter how you use SwitchMan, you'll enjoy smooth, flawless start-ups, switching and operation.

Easy to connect and operate

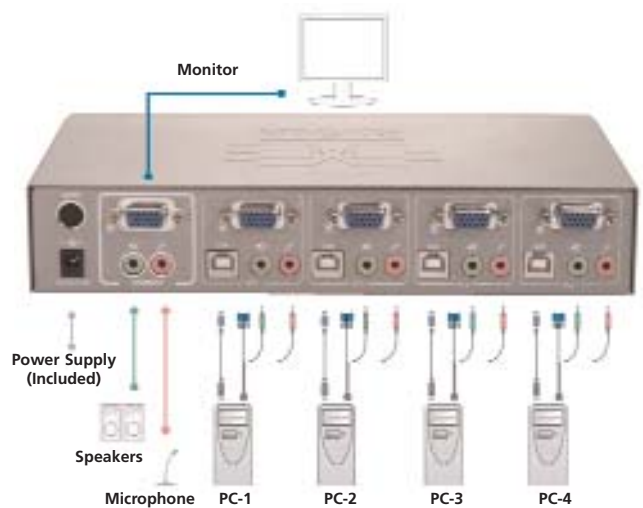

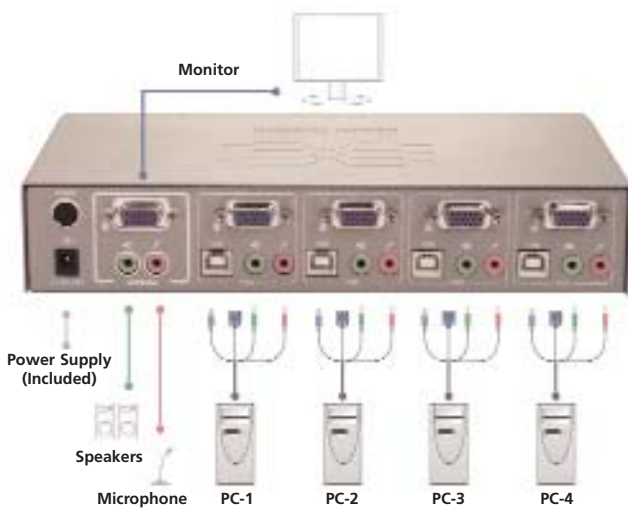

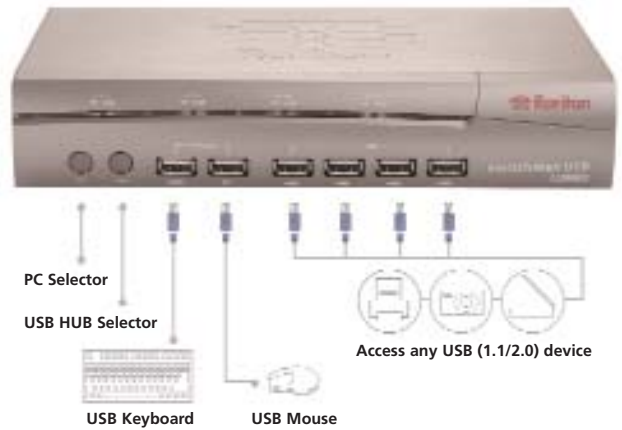

Connect both PCs and/or Apple Macs® (USB versions only) to SwitchMan using Raritan's premium, ultra-thin KVM cables for the highest video and audio quality. Your standard keyboard, mouse and VGA monitor plug into the unit with no software to load or complicated set up. Standard features such as a PC selection button, LED indicators and hot-keys make SwitchMan operation a snap. Operate any of four PCs by simply pushing the corresponding button or hot-key on your keyboard.

SwitchMan USB

- ▶ Save desktop space and consolidate control of your USB connecting computers and USB peripherals
- ▶ Share printers, scanners, digital cameras, audio equipment, PDAs and other USB peripherals
- ▶ Audio support: Share speakers and microphone for multi-media applications
- ▶ Easy installation with color-coded connectors

SwitchMan USB-COMBO

- ▶ Save desktop space and consolidate control of your USB and PS/2 connecting computers and USB peripherals
- ▶ Share printers, scanners, digital cameras and other USB peripherals
- ▶ Audio support: Share speakers and microphone for multi-media applications
- ▶ Easy installation with color-coded connectors

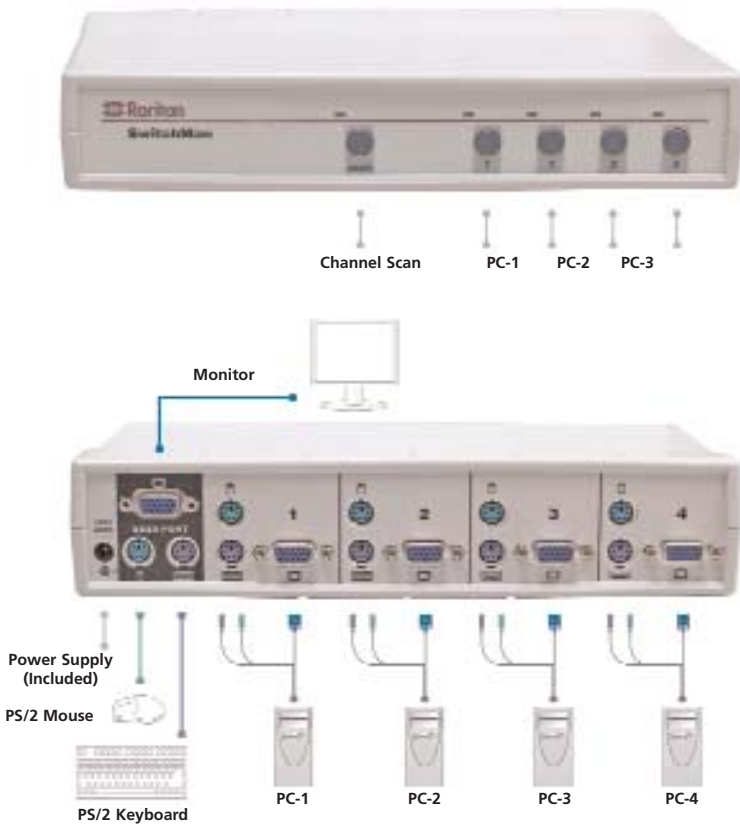

Not shown: Separate Keyboard, Video, Mouse and audio connectors on the PC end of the cable.

Not shown: Separate Keyboard, Video, Mouse and audio connectors on the PC end of the cable. PS/2 keyboard and mouse signals integrated in to the video connector at the switch end of the cable.

SwitchMan PS/2

- ▶ Works with PS/2 desktops, workstations, servers, and laptops
- ▶ Prevents keyboard lockups through complete keyboard/mouse emulation with dedicated processors for each PC
- ▶ Allows switching between PCs from front panel pushbuttons with LED indicators or easy hot-key commands
- ▶ Offers flawless PC boot-up and operation

Not shown: Keyboard, Video and Mouse connectors on the PC end of the cable.

Accessories - Included with SwitchMan USB and SwitchMan USB-COMBO

Raritan is a leading provider of secure IT infrastructure management solutions. We offer IT and facility directors, managers and administrators the control they need to increase power management efficiency, improve data center productivity and enhance branch office operations. In over 50,000 locations worldwide, our integrated secure in-band and out-of-band products help companies monitor and manage their energy, servers and other IT devices. Our intelligent PDUs combined with energy management software and environmental sensors, offer remote power control and monitoring at the rack and device level, empowering data center owners with information to improve uptime and capacity planning, while efficiently utilizing energy to save power and money. And our access solutions, including KVM, serial and centralized management devices, offer unprecedented control of servers to maintain mission-critical environments. Raritan's OEM division provides embedded hardware and firmware for server and client management, including intelligent power management, KVM over IP, IPMI and other industry standards-based management applications. Raritan has 38 offices worldwide, serving 76 countries. For more information, please visit Raritan.eu
